

## ***Larry & Stretch as Bill & Ben in the Nordic Countries***

### **A Really Huge Example of Coordinated Publishing Including 1,705 Western Massmarket Paperbacks in Denmark, Finland, Norway and Sweden 1961-2010**

**ANDERS N. NILSSON, Nordmaling, Sweden**

[Version 18 June 2025]

#### **Introduction**

Massmarket paperbacks in numbered series including translations of the Larry and Stretch stories written by the Australian author Leonard F. Meares (1921-1993) were the flagship of western popular literature in the Nordic countries during fifty years. Although also published in other countries like the UK, the US, and Germany, these stories reached their greatest popularity in Australia and the Nordic countries where they sold in extremely high numbers.

Leonard F. Meares was extremely prolific, and got published at least 748 western novel-length stories, most of them under the pseudonym Marshall Grover (Whitehead 1991, AustLit 2011, Johnson-Woods 2012). Between 1955 and 1966 his novels were published by Cleveland, chiefly in their Western and Cougar series, and from 1967 to 1992 by Horwitz, including their imprints Castle, Scripts, and Stag. Most of the Cleveland editions were reprinted several times, and only rarely had any dates printed in them. Also Marshall Grover's Big Jim novels got popular in the Nordic countries, but were not so many as the Bill & Ben stories.

Meares' most well-known pair of heroes, in Australia known as the two Texas drifters Larry and Stretch, were in the Nordic countries renamed Bill and Ben, with their full names being Lawrence Valentine and Woodville Eustace Emerson. These two heroes first appeared in the novel *Drift!*, first published in Australia in 1956 as Cleveland Western #595. Being the first of 451 novels with the same pair of heroes, the first line of the novel ought to be known as a minor classic: "Someone's just killed Dora Berry". The last novel published was *Salvo Pass* in 1994, after Meares' death. It was only published in Swedish translation as *Fångarna i Salvo Pass*, Bill & Ben #480. All but one of Meares' Larry & Stretch novels were published in Nordic translation.

When in 1968 and 1969, Horwitz in cooperation with Bantam had 15 stories published in the US, the name of the author was changed to Marshall McCoy, and Larry & Stretch became Larry & Streak, names also used in the corresponding Australian editions for a brief period.

The publishing of the Bill and Ben series was, especially from the start, strictly coordinated among the Nordic countries. The main organizer was the Danish publisher Winther, that supplied their cooperating publishers in Finland, Norway, and Sweden with both texts and cover designs. Also the printing initially took place in Denmark, at Uniprint. Copyright is in

the Bill & Ben books published up to 1966 attributed to “The Co-Operating European Pocket Book Publishers Ltd.”

The high popularity of the series created an increasing demand for new stories, and as shown by Nilsson & Pettersen (2016) many of the stories were translated from manuscripts long before they eventually were published as books in Australia. This was seemingly the case with at least 47 of the stories printed in Scandinavia. Moreover, eight stories published in Swedish translation 1992-1994, three of them also in Denmark and Norway, were never published in the English language (Nilsson & Pettersen 2016). As the story was told by David Whitehead (2025), the Australian Horwitz publisher ended their paperback series in 1992, including also Larry & Stretch. However, they asked Meares to continue his writing as they could sell his new stories to Scandinavia, where the series was still being published. This resulted in a number of Larry & Stretch novels only being published in Swedish, Danish, and Norwegian translations.

I will here take a closer look at the Nordic coordination in Bill & Ben publishing, studying separately the texts and the cover paintings. Besides some statistical parameters like number of books and stories per country, the sequence and selection of titles will be quantified over time. The cover paintings, that lack titles and in most cases also names of artists, have been identified by unique numbers in order to make it possible to study their coordination among countries in ways similar to those applied to the texts.

### **Studied material**

The Swedish Bill & Ben editions were listed by Nilsson (2023), and book covers were here studied in my own collection with the addition of information from Patrik Myrman’s Internet page *Seriellagret* (Myrman 2025). Cover scans and metadata from the Finnish books were found at Miikka Kivimäki’s Internet page devoted to western paperbacks (Kivimäki 2025). Some missing cover illustrations were found at various Internet sites, and some also supplied by the National Library of Finland in Helsinki. Most of the information on Danish books were found at Gunnar Olsen’s Internet site devoted to massmarket paperbacks, with the addition of cover scans received directly from him. Two other useful sites were Søren Jacobsen’s blog *Rygende revolvere* (Jacobsen 2022), and the anonymous site *Random bits of knowledge*. Finally, information on Norwegian books originated from the recent Bill og Ben bibliography by Nilsson & Ødegaard (2025). The Danish ebooks were studied at some online book stores. Data on the Australian editions follow my list of Meares’ western novels including printing years and book numbers (Nilsson, unpublished).

### **Book and text coordination**

The Bill & Ben paperback series differed in duration and number of books in the four countries studied (Table 1). In Norway, the book numbers 157-160 were seemingly never used, resulting in 493 books in the series although the last one has number 497. In both Finland and Norway, all Bill & Ben books were published within a single numbered series, whereas Denmark and Sweden both had three series each, including the reprint series Bill &

Ben Special, and in Denmark also Tom & Tex. Unsold copies of Bill & Ben books returned to the publisher were also redistributed in Scandinavia as double volumes with new covers sold at a reduced price (Nilsson 2017). These “Double Westerns” are not included here.

Table 1. Series of western massmarket paperbacks including Bill & Ben novels published in the Nordic countries. For each series is given year when started and ended. The total number of books within each series is supplemented by the number of books representing reprints and double volumes. The final column gives for each series the number of different stories first published in translation in each country in that series.

Country	Series	Start	End	#books	#reprints	#doubles	#stories 1st
Danmark	Bill og Ben	1961	1994	383	1	0	382
	Bill og Ben Special	1974	1984	34	34	0	0
	Tom & Tex	1970	1970	4	4	0	0
Finland	Bill ja Ben	1962	1992	220	1	0	219
Norway	Bill og Ben	1961	2010	493	129	36	365
Sweden	Bill och Ben	1963	2000	504	70	0	434
	Bill och Ben Special	1974	1982	54	54	0	0
	Wild West-bok	1962	1963	13	0	0	13
Total	All series	1961	2010	1705	293	36	450

In Sweden, Bill och Ben books were initially published in the series Wild West-böckerna by the Wennerberg publisher, and here mixed with books about Walt Slade. This series was numbered from 36 to 60 with Bill och Ben having the even and Walt Slade the odd numbers. Consequently, Swedish Bill och Ben #1 was in fact the 14<sup>th</sup> book published about these two heroes. In Sweden, but not in Denmark, the “Special” label was also used on reprints within the normal series with even numbers in the interval #246-274. The last book with this label was #290. The four Danish Tom & Tex books represented a novel way to reprint old Bill og Ben stories, giving new names to the two Texas heroes.

Finland’s low number of books is somewhat compensated by the almost total absence of reprints. The single reprint known corresponds to only one half % of their books. On the other hand, Norway’s 493 books include 26 % reprints, boosted by the fact that all but one of their double volumes represent reprints. Sweden, with the highest number of books, has 22 % of reprints, and Denmark only 9. Most likely, both the total number of books published as well as the proportion of reprints are positively related to the national interest in the Bill & Ben stories.

Annual book numbers, including also all the reprints, were relatively high between 1962 and 1991, and peaked in 1976 with 63 books (Figure 1). The reduction after 1991 was stepwise due to publication ending first in Finland, then in Denmark, and in 2000 also Sweden. After 2004 the remaining Norwegian books were double volumes, meaning that the annual number of titles was in fact twice as high as seen in the diagram.

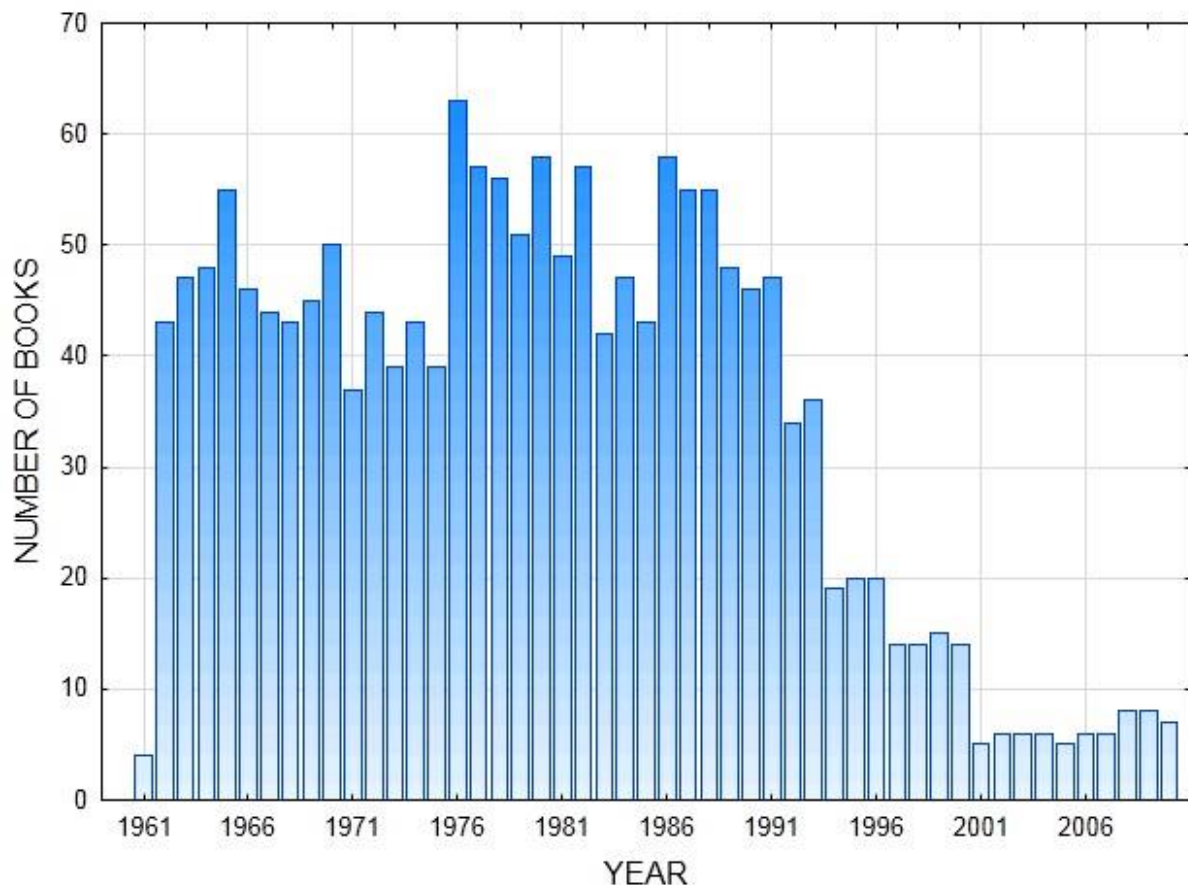

Figure 1. Annual number of books with Bill & Ben published within the Nordic countries 1961-2010. Book production peaked in 1976 with 63 books. Publication ended 1991 in Finland, 1993 in Denmark, 2000 in Sweden, and finally 2010 in Norway. Total number of books is 1,705.

Altogether, 450 out of 451 Larry & Stretch/Streak stories were published in translation in the Nordic countries (Appendix 1). The only one overlooked was *Young Bucks from Texas* (Horwitz #211, 1982). The number of stories published was highest in Sweden and lowest in Finland (Table 1). Sweden also stands out by its 40 unique stories, in contrast to the 205 stories shared among all four countries (Table 2). Most of the 143 stories shared among three of the countries were those not published in Finland. Almost all of the 62 stories shared between two of countries were shared between Sweden and Denmark or Norway.

One important aspect of coordination of book series in different countries is the sequence in which the titles are published. Generally, one would expect the coordination to be good initially, and then start to fall apart after some period of time. This was also the case with the Bill & Ben books of the Nordic countries. However, sequence coordination was restored in 1988 when Winther introduced a new general cover design of their western paperbacks, and at the same time changed the name of the series to Bill & Ben in all countries. But also this second wave of coordination degraded with time.

In order to quantify this aspect the material was delimited to the 205 titles published in all four countries, and serial book numbers were replaced with a running number following the

Table 2. Number of Larry & Stretch/Streak stories by Leonard F. Meares published in translation in: (D) Denmark, (F) Finland, (N) Norway, and (S) Sweden. Upper part shows for each country the number of stories known from one, two, three or all four countries. Lower part shows the frequency of the different combinations of countries observed.

<b>Sum</b>	<b>40</b>	<b>62</b>	<b>143</b>	<b>205</b>	<b>450</b>

publishing sequence of each country. In this way the effects of different serial structure, reprints, and excluded titles were avoided. Pair-wise comparisons of countries using the distance between the publication sequence number of each title, summed over all 205 titles were then calculated (Table 3). This index takes a zero value when the match is perfect, and increases quickly when sequence differences start to accumulate. Comparing two inverted series of 205 titles results in an index of 21,012. In order to be of a more general use, the index would have to be developed to compensate for different number of books in the datasets.

As seen in Table 3, it is Finland that stands out as deviating from the other three countries. Besides some early minor changes in sequences, it seems that the books were in Finland published at a lower frequency, resulting in some generally earlier titles coming in later in the publication sequence than in the other countries. A number of titles with sequence numbers over 100 in Finland correspond to numbers half as high as that in the other countries.

The titles of the novels used in the four different countries show enough differences to make you think that they were translated independently in each country. On the other hand, they are

in many cases identical in two or more of the countries. It is possible that some pattern is present in this variation, but I leave the analysis of this aspect of coordination undone, chiefly because of my poor knowledge of the Finnish language.

Table 3. Pair-wise comparison of sequence coordination in the publication of Bill & Ben stories in the four Nordic countries. Index based on standardized sequence numbers of the 205 stories published in all four countries. Coordination highest between Norway and Sweden, and lowest between Finland and Norway.

### Coordination of cover paintings

All Bill & Ben books from the Nordic countries have front covers with paintings and not photos. I have earlier characterized the paintings on the Swedish books as having a mixed origin, representing artists from Australia, Germany, Italy, Spain, Turkey, and the US (Nilsson 2018). Only very few of the Australian paintings had been used on Cleveland's Larry & Stretch books in Australia, and were there combined with other titles. Thus, all paintings on the Nordic books have to be considered general and not made to match the stories they are here illustrating. Most likely, they were already used on other books in other countries. Between 1966 and 1986, most covers were designed by Tage Jørgensen's studio in Denmark.

There are many examples of paintings used on Bill & Ben books in one Nordic country being used on other western paperback series in some other. Consequently, no specific Bill & Ben cover paintings exist, leaving the reader without visual evidence of the two Texas heroes' looks. However, I have earlier documented the fixed back cover drawings supposed to depict Bill and Ben on Danish and Swedish books (Nilsson 2022). A drawing from an American book on the main series, and another one from a Spanish book on books in the Special series. Two alternative views of the pair of Texas heroes, not very similar. See also the eBook section below for more about paintings depicting Bill and Ben.

As cover paintings normally don't have any original titles or known creators, I've decided to give every painting seen on a Nordic Bill & Ben book a unique number. For practical reasons, I started with giving the 493 Norwegian books with their 493 different paintings a running number based on their publication sequence. Also the double volume books have only one

front cover painting. Then followed the cover paintings on Finnish books not present on Norwegian books. Next in line were the Danish cover paintings not present on Norwegian nor Finnish books, including also the reprint series Bill og Ben Special and Tom & Tex. Finally, the cover paintings unique to the Swedish books were added. Reprinted cover paintings were observed in all countries except Norway, and the paintings of repeated use within the same

Table 4. Number of cover paintings on Bill & Ben paperbacks published in: (D) Denmark, (F) Finland, (N) Norway, and (S) Sweden. Upper part shows for each country the number of paintings known from one, two, three or all four countries. Lower part shows the frequency of the different combinations of countries observed. Reprints of cover paintings within same country excluded.

country shared the same number. The presence of all 755 observed cover paintings on the 1,705 books studied is listed in Appendix 2. Identical combinations of stories and paintings in different countries are also shown in this list.

“Reprint” normally refers to a new book edition of the text, but seeing the book as a combination of a text and a cover painting, an expanded definition of the word makes it necessary to separate reprinted texts from reprinted cover paintings. I have here also included reversed or otherwise manipulated paintings among the reprints. Among the Nordic Bill & Ben paperbacks, reprinted texts were much more frequent than reprinted paintings. Whereas Finland had only two reprints, both Denmark and Sweden each had eight. Painting #252 was

even used on three of the Swedish books. As reprinted once also in Denmark, this painting was in the Nordic countries combined with seven different stories.

Sweden had the highest and Finland the lowest number of paintings on their Bill & Ben paperbacks (Table 4). As the reprinting of paintings was rare, these differences chiefly match the total number of books published in each country. The number of text reprints is of less importance, as these normally were provided with new cover paintings. Reflecting the coordination among the Nordic countries, 158 paintings can be seen on books from all four countries. Moreover, 178 paintings were used in three of the countries, in a majority of the cases excluding Finland. Paintings shared between two of the countries were most common between Sweden and Denmark or Norway. The high number of paintings unique to one of the countries, 319, is chiefly due to separate cover art being used in Norway and Sweden after that Bill & Ben books were no longer published in Denmark or Finland.

During the first two years, from late 1961 to late 1963, stories and cover paintings were combined in the same way in all four countries (Appendix 2). After that, Finland started to combine them differently and also used paintings not seen on the Norwegian books. Coordination among the Scandinavian countries remained high until 1974, after the first 150 books. In 1978, after the publication of fifty books more, coordination became poorer, and finding identical combinations of stories and paintings in different countries was now a rare thing. It was not until 1988 with book #327 in Denmark and #326 in Norway, and #343 in Sweden, that coordination was restored together with a new cover design, and the name of the series changed to Bill & Ben in all four countries.

The second wave of high coordination lasted for about four years, and after that the Finnish series was ended in 1992, there was a split in the use of cover paintings between Norway and the two remaining countries. The Danish/Swedish coordination remained high until early 1994, when the Danish series was put to an end. After that, Norway and Sweden continued to use separate cover paintings until the Swedish series was ended in 2000. Coordination was no longer possible during the last ten years of Nordic Bill & Ben, when Norway alone continued to publish reprints of stories with new cover paintings, after 2005 as double volumes.

### **Danish ebooks**

Starting in 2016, Egmont under their imprints Linghardt & Ringhof and Winther published 343 of the 383 Danish Bill & Ben paperbacks as eBooks. Their electronic covers mixed already used paperback cover paintings with the Stanley Pitt paintings used on Cleveland's mid 80's Cougar reprints of the Larry & Stretch stories, also used in UK by Piccadilly Publishing on their reprint series. The Stanley Pitt paintings were used on 136 of the Danish eBook covers, but the number of original paintings is much lower as many of them represent zoomings and croppings. As Cleveland only published 79 different Larry & Stretch stories, one would not expect more original paintings than that. The majority of the re-used Danish paperback covers had the same text/painting combinations as used in the printed books. Six of the paintings were used twice, and five paintings not previously used on Bill & Ben books

were introduced. Two of them from Cougar #614 reprint of *Diary of a desperado*, and #665 of *Double Trouble*. A few of the Danish paperback titles were slightly adjusted in the eBooks.

In contrast to the Nordic Bill & Ben paperback cover paintings, the ones made by Stanley Pitt for Cleveland were made specifically for the Larry & Stretch reprint series. In most of these pictures can be seen a dark-haired Larry/Bill, together with a blonde Stretch/Ben. The latter almost always with a cigarette between his lips. Most likely these paintings were story-specific from the start, illustrating some scene described in the book. Egmont's manipulations of Pitt's paintings smashed these associations between the texts and the cover art, for sure.

Twenty of the Danish eBook titles were in 2018-2020 published also in Swedish translation by Saga Egmont. Most of the Swedish eBooks used the Stanley Pitt paintings known from the Danish editions. Quite remarkable is that the painting by Walter Stackpool used in 1976 both in Denmark and Sweden on the first paperback in the Jim & Jeff series now appears on eBooks about Bill & Ben in the same two countries. Jim & Jeff was launched by Cleveland as an alternative to Larry & Stretch, that Horwitz had grabbed from them in 1967.

### **Australian and Nordic order of titles compared**

The publication sequence of the Australian first printings is difficult to establish, although all books belong to numbered series. Numbers are only rarely cited in library catalogues. Cleveland had them printed on the front cover, but their lack of printing dates and frequent reprinting with higher numbers still makes it difficult to establish their order. Many of the early Cleveland covers are very difficult to find. Horwitz' books, on the other hand, all had printing dates, but their serial numbers were only to be seen at the bottom of the spine. My data set includes 394 books with numbers, of the 443 Larry & Stretch/Streak stories published in Australia. This sequence of titles is here compared to the Danish Bill og Ben series with 382 different titles. Denmark was chosen to represent the Nordic countries as the Winther publisher was at the core of the Nordic cooperation. After excluding the 51 titles of which the Australian book numbers are not known plus the three titles not published in Australia, 328 remain in the data set used for comparing the publication sequence. Before the analysis, books were renumbered from one to 328. I will start with comparing printing years, and then take a closer look at the sequence numbers.

The initial Danish time lag of 6-7 years vanished already after less than twenty books, and then was mostly two years until 1970 or the first hundred books. *Uneasy Money*, the 104<sup>th</sup> book, had a 20 year delay when published in Denmark in 1990. On the other hand, book #103 was the first one printed a year earlier in Denmark than in Australia. The following period, up to book #221 published in Australia 1983, did not change much besides a slow decrease in the delay up to seven years, and occasional titles up to ten tears. Starting with #222 *Wagon Number 3*, every other book was printed in Denmark about ten years *before* Australian publication. The early 70' was the period when many titles in the Nordic countries were translated from manuscripts, and books #270-277 were all published in Scandinavia 15 years

before in Australia. After that things returned to normal, with most titles printed in Denmark from one year ahead to a one or two year delay.

Differences in the sequence numbers very much show an up-scaled version of the pattern described above for years. The 15 year Danish advance then corresponds to an over 160 number advance, and the 20 year delay to an over 190 number delay. As *Drift!*, the first book in Australia, was book #26 in Denmark, the sequence differences were there already from the start. Looking at the first hundred Australian titles, the sequence delay was in most cases rather modest, but interrupted by titles with a longer delay, like *Wild Trail to Denver* with 67 numbers, or *Doc Rance of Rambeau* with 115. The remaining period up to the start of the manuscript translations was characterized mostly by high delay numbers, in most cases between 50 and 80. The interval #224-277 included the frequent over hundred numbers Danish advance, and after that differences got lower and dominated by a more modest Danish advance.

These data clearly show that sequence order in the Nordic countries did not follow the original Australian one very close. Instead periods of more modest differences were interrupted by more pronounced differences in both directions. In fact, only five books had identical positions within the sequence in Denmark and Australia. Some general pattern of similarity would be expected to occur only from the situation of one series of editions tracking another with a slight delay. But the possibility of translating foreign editions from unpublished manuscripts may have the power to blur also these patterns.

### **Some final words**

As here documented, the Nordic coordination in the publication of the Bill & Ben books was already from the start very strong. The main deviation was that in Sweden the books did not get their own series until the 14<sup>th</sup> book, which disturbed the numbering sequence of titles relative to the other three countries. My impression is that the main idea with the coordinated publishing was that Winther's licensing of the material from Cleveland for all four Nordic countries at the same time saved some money, compared to each country making its own deal with the Australians. As Winther initially also designed the covers and arranged the printing, they also had a product to sell to their cooperating publishers in the other countries. A product that seemingly turned out to be the best selling massmarket western paperbacks in the region for fifty years.

Both when it comes to the stories and the cover art, it is Finland that stands out as less integrated in the Nordic coordination. It is also Finland that published the fewest titles and terminated the Bill & Ben series first. One possible explanation for this pattern is that the series did not reach the same success here as in the other three countries. The Finnish market was not big enough to swallow new titles as quick as in the other countries, that then had to be produced at a lower rate, and this lagging behind disturbed the coordination. On the other hand, as noted by Johnson-Wood (2012, p. 145): "Finland, in particular, seems to have had some relationship with Cleveland as nearly all of the Cleveland novels, starting in the 1960s,

were reprinted.” My impression is that Finland, rather paradoxical, was number one when it comes to reprinting Australian western novels, but still had a problem in selling as many Bill & Ben books as the three Scandinavian countries managed to do. One could wonder how good the Bill & Ben deal with Winther was when compared to the Finnish publishers’ direct deal with Cleveland for their other western novels? Maybe it is of some importance that a Bill & Ben book in 1972 costed 2:20 mark, whereas other Cleveland-based series like Arizona, Colt, and Lännensarja could be bought for only 1:50?

How popular Bill & Ben became in each country may also be seen in the number of reprint editions published. Here again Finland stands out with its single reprint, whereas Denmark is intermediate, and Norway and Sweden both had over one hundred reprinted titles. On the other hand, Denmark later made up for its lack of reprints by the massive production of eBook reprints. As the series in both Norway and Sweden turned to published only reprints for some period before the end, there is a high correlation between total number of books, number of reprints, and how many years the series existed in each country.

From what I’ve seen in other series characterized by Nordic coordination, like for example the Walt Slade books by Jackson Cole (= A. Leslie Scott), the pattern of initial strong coordination degrading with time may be a general one. What’s more surprising with Bill & Ben is the presence of a second wave of strict coordination in 1988, when Winther standardized the cover design of all their western paperback series, e.g. Clay Allison, Louis L’Amour, and Morgan Kane, and changed the name to Bill & Ben in all four countries. This second period of coordination lasted for some years until the series was closed down, first in Finland 1992, and then in Denmark 1994, after that Norway and Sweden got more independent of each other, and Nordic coordination was more or less totally lost.

Figure 2. First Bill & Ben book published in Denmark, Finland, Norway, and Sweden. Original title is *Ride out Texans*, and coordination is perfect except that the Swedish book is #36 of Wild West-böckerna, and the others #1 of the Bill & Ben series.

**Appendix 1.** List of 450 Larry & Stretch/ Streak novels by Marshall Grover (= Leonard F. Meares; Marshall McCoy in Bantam editions) included in translation in the following series: Denmark (Bill og Ben), Finland (Bill ja Ben), Norway (Bill og Ben), and Sweden (Bill och Ben). All four series changed names to Bill & Ben from DK #327, FI #195, NO #326, and SE #343. A “W” after a Swedish number refers to the Wild West-bok series. No reprints have been included.

Original edition of *Ride out Texans* published in 1958 by Cleveland as Cougar Western #348. See page 11 for the same combination of story and cover painting by Stanley Pitt in Nordic editions translated to four different languages.

**Appendix 2.** List of 755 cover paintings used on paperbacks with Bill and Ben in the Nordic countries. For each painting is given serial numbers of books that have used it in (NO) Norway, (FI) Finland, (DK) Denmark, och (SE) Sweden. The list starts with all Norwegian books, and then continues with paintings not used in Norway but in Finland, Denmark (DS = Bill og Ben Special, DT = Tom & Tex), and Sweden (SS = Bill och Ben Special, SW = Wild West-böckerna). Green colour is used for retained combinations of story and painting compared to the country at the far left column with presence. Blue colour is used for repeated use of the same painting within the same country.

**Appendix 3.** Finnish Bill ja Ben front covers with paintings not used on Norwegian books, and Danish Bill og Ben cover painting not used on Norwegian or Finnish books. Most Finnish scans from Kivimäki (2025), and most Danish scans from Olsen (2025). Almost all Norwegian front covers are shown in Nilsson & Ødegaard (2025), and all Swedish ones can be seen at the Serielagret site (Myrman 2025). The numbers of the books with cover paintings unique to Sweden can be read from Appendix 2.

Plate 1: Selected Finnish books between numbers 28 and 137.

Plate 2: Selected Finnish books between numbers 138 and 218.

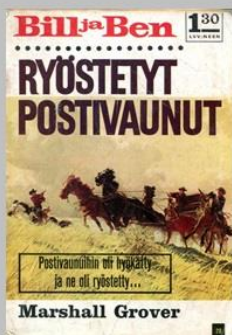

Plate 3: Selected Danish books between numbers 73 and 266.

Plate 4: Selected Danish books between numbers 268 and 305.

Plate 5: Selected Danish books between numbers 307 and 366.

Plate 5: Selected Danish books between numbers 367 and 383, and Special between numbers 11 and 29.
